

# Managed WiFi Made Easy

access network health | create customer experiences | strategize business decisions

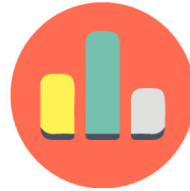

## Features

### NETWORK MONITORING

Real map to monitor network health statuses of all sites, depending on the roles and permissions.

- Site Details (address, IP)
- Site Status (healthy, unhealthy, warning)
- Reasons for failure (if any)
- System and Network Statistics

### USER AUTHENTICATION TYPES

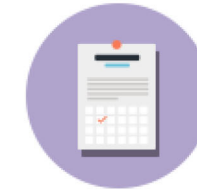

- Social Media (Facebook, Twitter, Google+, Instagram, LINE, WeChat)
- Complimentary
- User ID and Password
- Access Code
- Credit Card
- Registration Form

### ADMIN MANAGEMENT

Centralized management & multi-level administration control

- Multi-level Admin Access and Control - Role-based admin access control allows the segregation of multiple admin roles.
- Email Notification - Notify Admin by SMS/ email if any of the modules is down (customizable)

## Understand customer behavior for better data-driven decisions

### REPORTING & ANALYTICS

ACS features Central Management System for configuration, management, and reporting. This shows detailed reporting of social media analytics, user preferences, etc. on both site and group levels.

Interactive dashboards and drill down graphs for non-technical user with the ability to access data and build business intelligence reports and analytics.

- Device and Preference - OS, Devices, Browsers used by Users and the websites visit
- Usage - User dwell time, repeat vs new, average visits and frequency of visits
- Demographics - In-depth comparison and breakdown of Users' Gender, Age, Country, Login Preferences, Weekly Comparisons
- Social Media - User Affinity (Likes) by gender and age, birthday suggestions

Consolidated reports for multiple sites help you understand and compare performance of your sites.

### LOCATION PORTAL MANAGEMENT

Centralized management and deployment of welcome portal on a group or site level. Extremely flexible and customizable welcome portals and landing pages.

### BANDWIDTH MANAGEMENT

Allows to define a fixed guaranteed bandwidth for certain users.

Intelligent bandwidth management for Limiting Session Volume and usage status at a glance.

### USERS DATA

Details of each user consolidated from various sources to help in designing campaigns and marketing:

- Demographics
- Birthday
- Device Preference
- Likes / Affinity
- Connections / Influence
- Country / Places

### DOWNLOAD REPORTS

ACS Admin Users may view and download weekly and monthly summary reports in PDF format.

## ASSESS

Network monitoring dashboard enables you to have high visibility of your network's health status and know the reasons for any failure instantly.

## CREATE

Portal management allows you to create customized captive portals and launch across multiple sites.

## STRATEGIZE

Business analytics and consolidated reports enable you to understand your users better.
